EDUCATION

University of Southern California (USC)

Master of Science in Computer Science - Artificial Intelligence

Los Angeles, CA

Expected Graduation, May 2027

University of Maryland, Baltimore County (UMBC)

Bachelor of Science in Computer Science, GPA: 3.802

Baltimore, MD

Aug. 2021 – May 2025

EXPERIENCE

Software Developer Intern

Dec. 2025 – Present

Bitcoin Credit Services

Remote

- Worked on backend services using TypeScript, NestJS, PostgreSQL, Redis, Kafka, and Docker to support a multi-tenant financial platform.
- Implemented and tested backend endpoints, data models, and service logic within a production microservices codebase.

Software Engineer Intern

June 2024 – June 2025

NeuroLeap Corp

San Jose, CA

- Built full stack features using React, JavaScript, Node.js, HTML, and SQL that improved system reliability and made core workflows easier for customers to use.
- Worked with senior engineers through Git-based code reviews, applying feedback and guidance to improve implementation quality and development practices.
- Deployed backend microservices on AWS (EC2 and S3), improving system reliability and enabling the platform to handle higher user traffic during peak usage.
- Designed and deployed REST APIs using Go and Node.js, handling higher request loads and reducing latency for data-intensive tasks.

Teaching Assistant

Aug. 2022 – May 2025

UMBC Department of Computer Science

Baltimore, MD

- Taught core programming concepts including Python, C++, object oriented programming, and data structures to large undergraduate classes.
- Worked closely with course instructors, taking direction and incorporating feedback to adjust lessons and support student learning.

PROJECTS

HarmoniaNet | *Docker, Python, React, FastAPI, Librosa, CNN* | [Website Link](#)

Feb 2025 – May 2025

- Built a music genre classification system using Python, spectrogram features, and convolutional neural networks.
- Deployed an end to end web application with FastAPI, Docker, and React to support audio uploads, real time predictions, and visualization.

HydroSense | *React, JavaScript, Firebase, ML, Twilio, SendGrid* | [Demo Link](#)

Sep 2024

- Developed a real time monitoring platform using React, JavaScript, Firebase, Twilio, and SendGrid.
- Implemented automated alerts and basic predictive logic to identify abnormal sensor readings and reduce oversight.

TravelTrek | *TypeScript, React, Firebase, OpenAI API* | [Github Link](#)

Sep 2023 – Dec 2023

- Built an AI powered travel planning application using TypeScript, GPT based APIs, and Firebase.
- Implemented authentication and hosting to support reliable user access and personalized recommendations.

Personal Portfolio Website | *React, GitHub Pages, AOS, Framer Motion* | [Website Link](#)

May 2025

- Designed and built a responsive portfolio website using React and JavaScript with lightweight animations.
- Deployed the site using GitHub Pages to support easy sharing and recruiter access.

HONORS AND INVOLVEMENT

- Graduated *magna cum laude*, University of Maryland, Baltimore County
- Dean's List & President's List (multiple semesters)
- Member, Google Developer Group
- CodePath TIP 102 Technical Interview Prep Program
